Harvest of Talents

Rupali and her husband have 5 children - 4 daughters and 1 son. The daughters were at serious risk of their father sending them off to be married at a very young age—a common practice in their village. Rupali saw the harm that this could bring and advocated for them by enrolling them in our partner's school. This has given the girls a chance at a new life through education and care, as they receive nutritious meals through the Harvest program. Their father is hesitant and remains stubborn about marrying them off. **Please continue to lift up this family in your prayers. Our specific prayer is that the Lord will grant the father patience and wisdom—to watch and allow his daughters to develop fully: physically, academically, and spiritually.**
