

The Life of Christ Visualized

Gifts given to the Book Club for November will be used to produce *The Life of Christ Visualized* in the Servitka dialect of the Romani language. This book faithfully tells the gospel story from Jesus' birth to His ascension into heaven, using both illustrations and text.

LATM and its partners have produced this book in multiple languages worldwide, and this edition in Servitka Romani will be the thirtieth!

Roman and Irya Diachuk of Bible Translators of Ukraine share a new translation of *The Life of Christ Visualized* with the Halversons.

In September, Karl and Jill Halverson visited the Bible Translators of Ukraine, who are translating Scripture into six different dialects for various Romani peoples (often referred to as "gypsies") scattered throughout Eastern Europe. They are also working on this book in all six dialects, with the Transcarpathian Romani edition completed this summer. The simple text and engaging images make this an ideal book for both children and adults with lower literacy rates. These individuals, often marginalized as the lowest members of society in Europe, face significant challenges such as poverty, alcoholism, lack of education, and abuse. Jesus truly offers the abundant life they need and are searching for!

The Halversons were able to visit a Ukrainian church during an outreach to the Roma community.
