Pine Lake Christian Church
Missions Committee
636 Pine Lake Rd
Sebring, OH 44672-1562

Dear Friends at Pine Lake,

For years we prayed for the opportunity to equip Christian leaders in Sierra Leone. This year we watched God answer that prayer.

Fifteen pastors, church leaders, teachers, and church planters gathered for TCM's first graduate-level course in Sierra Leone, the 50th country where TCM has equipped leaders for greater service to Christ. The students worked through challenging circumstances, including limited internet and electricity, because they believe that growing in God's Word will help them better serve their churches and those around them.

These leaders have already begun their next course, preparing to multiply what they are learning through their churches, classrooms, and communities. And the next cohort is expected to include 24 students, with many more leaders waiting for the opportunity to receive biblical training in Sierra Leone.

This marks the third country in Africa where TCM is equipping Christians for service and taking the gospel to a world that needs Jesus. By God's grace, we are just getting started in Africa.

We need your help to meet this growing need.

Will you pray for these students, their churches, and the leaders who teach them? And will you prayerfully consider giving a gift to help provide scholarships, strengthen technology and educational resources, support faculty travel, and make additional cohorts possible?

God has opened doors in Kenya, Liberia, and now Sierra Leone, and we believe He is preparing the way for even more. Together, through your prayer and generous partnership, we will continue equipping Christian leaders across Africa and beyond, strengthening churches and multiplying the impact of faithful leaders for generations to come.

Thank you for believing in this ministry, praying with us, and giving so that more men and women can be equipped to serve Jesus faithfully. Together we can help reach the leaders who will carry the Gospel to places we may never be able to reach ourselves.

With gratitude,

Ken Flora, Vice President of Global Outreach
